of Engineers®**  
Philadelphia District

## **PROJECT FACTSHEET**

### **Seaside Park Ocean County, NJ**

April 2009

---

**CONGRESSIONAL DISTRICTS:** Rep. Adler (NJ-3)

**APPROPRIATION / PHASE:**

Continuing Authorities / Feasibility

**BUSINESS PROGRAM:**

Beach Erosion / Flood Damage Reduction

**AUTHORITY:** Section 103 of the River and Harbor Act of 1962, as amended (Hurricane and Storm Damage Reduction)/

**LOCATION:** The study area is located on the backbay (west) side of Seaside Park, NJ, south of the State Route 37 bridge from the mainland.

**DESCRIPTION:** The study area is subject to erosion of the bayside beaches, which contributes to the larger problem of tidal flooding of streets and residences. The area was investigated in 1995 as a Section 103 CAP project, with a recommendation to proceed to a feasibility study. The study was not initiated due to lack of sponsor interest at the time.

**STATUS:** Funds in the amount of \$69.7K were received back in the early 1990s to complete a Reconnaissance Report dated 1995. No funds have been received recently for this project. FY09 funds would be used to negotiate and execute a Feasibility Cost Share Agreement with the non-Federal sponsor followed by completion of the feasibility study.

**FINANCIAL  
DATA (\$000)**

	Fed	Non-Fed	Total
Feasibility	200	100	300
Design & Implementation			TBD

**BUDGET**
